Fiscal 1969 Insured Wage Total of $704 Million Sets Record

$58.3 Million Gain From Fiscal 1968

The 123,753 workers employed in industries insured under Montana's employment security law were paid $704,060,046 in wages during the fiscal year 1969. This was $58.3 million over fiscal 1968. Since about $22.5 million in wages was absent from fiscal 1968 wages due to the 8½ month copper strike during that period, the insured wage gain over the year directly related to economic expansion and wage increments would be near the $36 million mark. The number of insured workers increased by 4,777 from fiscal 1968. Insured employers dropped by 42 from the 1968 total of 16,234 to 16,192 in 1969.

Six Industries Record Gains

Six of the seven major insured industry groups had higher wage totals in fiscal 1969. Wage gains were in this order with fiscal 1969 wage totals followed by increases from fiscal 1968: manufacturing, $166.8 million, up $23.7 million; trade, $217.1 million, up $15.7 million; mining, $48.7 million, up $13.7 million; service, $65.7 million, up $6.4 million; transportation, communications and utilities, $75.7 million, up $4.8 million; and finance, insurance and real estate, $42.7 million, up $3.6 million. Tight money and high interest rates in fiscal 1969 left their marks on the construction scene. Construction wage totals dropped by $9.6 million from fiscal 1968 to a total of $85 million. The average number of construction workers was down 1,470 from the fiscal 1968 average, and there were 54 less construction employers in fiscal 1969.

(3) Employers whose operations are not ascribed to an individual county, includes firms with unit or operations organized on a multi-county pattern and reporting as a single enterprise. Also included are some employers whose base operations shift from one location to another, such as construction contractors. Such concerns represent approximately 15.8% of state total employment and 18.6% of total wages. In a factual sense this category affects the employment economy of all Montana counties, proportionately to such factors as their population, commercial and industrial pattern, utilities represented, and volume of construction.

(4) Does not include employers who did not have employees during fiscal year. Employers are carried on Commission records until "none" reports have been received for two years.

County Wage Averages

Average earnings are derived from gross wages reported, divided by average number of employees on covered payrolls. Comparative figures for fiscal 1969 and 1968 appear below:
